About   ✏️

Greetings of the day, Thank you for stopping by my profile. I am a first year BTech CSE student trying to understand the core areas of computer science. Currently I am focusing on learning the basics like programming, problem solving, how computer systems actually work. I am still new but I enjoy trying small beginner tasks and exploring different concepts to see what interests me. I want to grow my skills slowly and build a strong foundation step by step towards the future I desire for myself.
